

NEVER. EVER. AGAIN.

INTRODUCING THE PATENT-APPROVED
VIDEO EVENT CAPTURE BY FORTECH.

You've been in the game long enough to know, if you want to elevate your manufacturing efficiencies, you must collect accurate and interpretive data. Typically, not every piece of equipment on a line has a Programmable Logic Controller or PLC. The cost of purchasing PLCs is only the start of your expense.

They have to be programmed and integrated into your controls strategy.

NOT anymore. Fortech has developed and patented a replacement for costly PLCs that can provide production counts and visually indicate unexpected downtime occurrences.

For additional information, contact us at solutions@fortech-usa.com. Finally, an end to expensive obstacles and a beginning to the identification of real downtime issues and root causes.

MANUFACTURING EXECUTION SYSTEMS

All at an affordable price and an accelerated installation.
